FOREWORD

TERMS. Remit by Post Office or Express Money Order, Registered Letter or Personal Check.

We will prepay shipping charges on all orders of \$2.00 or over. Kindly allow 25c extra on all orders below this amount.

As some of the plants are limited in number and may be sold out soon, kindly add to your list a few extras as second choice. We do not care to substitute.

As our stock is healthy, we endeavor to send out only such plants. If they arrive in slightly wilted condition, this usually is not serious and they should soon recover.

Only a few of the plants listed are hardy and should be given protection in localities where climate is cold and severe.

Nearly all our plants are shipped dry; if they arrive in a slightly wilted condition lay them between damp moss, or immerse in tepid water for a short time to restore them. It is better to start new roots on some kinds before planting permanently; do this by placing in clean sand to which may be added a half portion of leaf-mould or peat moss; after they are well rooted, plant in a mixture of one-third garden loam, one-third clean sand, and one-third leaf mould; a very small amount of bone-meal may be added. For desert cacti add a little more sand to this mixture. Have plenty of drainage in bottom of pot. In watering keep soil only slightly moist.

Prices quoted are in nearly all cases for small well rooted plants. Where large or specimen plants are desired kindly write for prices.

If the desired plant is not listed, write us; we may be able to secure it for you.

CACTI

ARIOCARPUS —Living Rock	
<i>assuratus</i>35
ACANTHOCEREUS —Showy, sometimes triangular	
<i>pentagonus</i>50
APOROCACTUS —Rat Tail Cactus	
<i>flagelliformis</i>35
